Cartier Strap Collection

A curated selection of bespoke commissions

Each strap within this collection has been designed to complement the watch it was made for - in proportion, material and tone.

The combinations shown reflect years of working with Cartier timepieces, where balance and restraint are often what make a piece feel complete.

“The bespoke strap that Nawaz created for my vintage Cartier Tank exceeded my expectations. The intent was to create something like Louis Cartier might have designed – and that’s exactly what they made for me.”

— Frank N.
